ELECTRIC PRESSURE WASHER
OWNER’S MANUAL

QUESTIONS, PROBLEMS, MISSING PARTS?
Before returning to your retailer, visit our web site or call our customer service at www.coleman-tools.com / 1-888-202-1118

PLEASE KEEP THE ORIGINAL BOX, PACKAGING AND RECEIPT. BEFORE OPERATING THIS UNIT, PLEASE READ THIS MANUAL THOROUGHLY AND RETAIN IT FOR FUTURE REFERENCE. IF YOU MUST STORE YOUR PRESSURE WASHER IN A PLACE WHERE THE TEMPERATURE IS BELOW 5°C, YOU MUST APPLY WINTERIZING PROCEDURE TO PROTECT IT. FAILURE TO WINTERIZE THE UNIT MAY PERMANENTLY DAMAGE PUMP AND VOID THE WARRANTY.

TECHNICAL SPECIFICATIONS

Pressure Washer Specifications

Peak pressure: 1900 PSI
Power source requirement: 120 V / 60 Hz
Electrical cord: 23' (7 m) 16 AWG
High-pressure hose: 20' (6 m)
Water flow rate (at 100 PSI): 1.6 US GPM
Current drawn: 13 A
Inlet water: Cold tap water

STORE FOR EASY ACCESS

Keep the maintenance guide and manual at a safe and easy-to-access location for future references. Operating and maintaining your unit appropriately allows it to perform properly and last longer.

QUESTIONS, PROBLEMS, MISSING PARTS?

Before returning this unit to your retailer, please visit our website www.coleman-tools.com or call our customer service at 1-888-202-1118.

MAINTENANCE QUESTION?

We have included a maintenance guide with this start up guide to ensure that you understand what you need to know in keeping your unit operating at peak performance. The manual also has detailed instructions on how to maintain this unit during winter and after daily usage.

⚠️ NOTICE ⚠️

IF YOU ENCOUNTER ANY DIFFICULTIES, REFER TO THE USER’S MANUAL OR VISIT OUR WEBSITE AT www.coleman-tools.com OR CALL CUSTOMER SERVICE AT 1-888-202-1118 FOR HELP.
**WARRANTY**

**LIMITED 1 YEAR WARRANTY**

This pressure washer is warranted to be free of defects in materials and workmanship under normal residential use for one (1) year.

Specific warranty applies to:
- Electric motor and pump are warranted for one (1) year.
- Standard accessories and attachments including the gun, wand/hose and coupler are warranted for a ninety (90) day period.

The warranty period is calculated from the date of purchase by the end user and covers the cost for replacement parts/equipment. In order to verify a warranty situation a copy of the original receipt or gift receipt must accompany the warranty claim, along with the manufacturer’s serial number from the product. Any warranty claim, work, or replacements given are to fulfill the terms of the original warranty period only.

The manufacturer’s obligation under this warranty shall strictly be limited, at manufacturer’s option, to replace any pressure washer or parts thereof, which in the opinion of the manufacturer, shows defect in workmanship or material. All decisions of Active Products with regard to this limited warranty shall be final. NO RETURNS or REFUNDS will be allowed by the retailer or manufacturer. To make a warranty claim or inquiry, you must call 1-888-202-1118. You must have the product serial number and receipt information ready.

If defects should appear within one year of purchase, you may return the unit with your receipt as proof of purchase to the place of purchase for an exchange of either a new or refurbished unit, at manufacturer’s discretion. There will be no REFUNDS provided.

The warranty does NOT cover:
- Merchandise sold as reconditioned, used, demonstration or floor models.
- Any commercial, industrial or rental usage of this product. Any such usage will void the implied warranty.
- Any product that has been damaged by freezing, dropping, misuse, neglect, accident, abuse, improper handling, normal wear and tear, or non-compliance with the owner’s manual.
- Any product that has been damaged by a contaminated water supply, water sediment or chemicals/detergents that are not approved by or recommended by Active Products.
- Any product that has been damaged by acts of nature such as fires, floods, earthquakes, lightening strikes, etc.
- Damage caused by repairs made by the end user or any service center not authorized by Active Products. Any such tampering will void the implied warranty.
- Any cost for shipping by the customer or authorized service center of the allegedly defective product.
- Any cost for shipping of replacement parts or accessories. Such shipping costs will be borne in full by the end user.
- Any non-standard or bonus accessory/attachment included with the original product. The manufacturer shall in no event be liable for injuries to persons or property, or for incidental, contingent, special or consequential damages arising from the use of this product. This warranty does not apply to damage due directly or indirectly to misuse, abuse, negligence or accidents; repairs or alterations; or lack of maintenance. The manufacturer shall not be liable for any misrepresentations by stores, store employees, or any parties, that make claims on this product.

This warranty is non-transferable and only applies to products that were sold in and reside in Canada.

If you have any questions or comments, visit our web site at www.coleman-tools.com or call our toll free customer service line at 1-888-202-1118.

---

**MAINTENANCE GUIDE**

**Optimum Winterizing Procedure**

Prepare the pressure washer for storage by running antifreeze or pressure washer pump savers into the unit. This will keep the internal parts lubricated, protected from rust, and prevent the pump from freezing.

Use Pressure Washer Antifreeze (039-8602-0)

**Store Indoor**

Store the unit indoor during winter will help keep the internal parts from freezing during cold weather.

---

**WARNING**

DAMAGES CAUSED BY FREEZING ARE NOT COVERED BY WARRANTY. PLEASE FOLLOW THE WINTERIZING PROCEDURE IN MANUAL TO ENSURE YOUR UNIT IS READY FOR COLD WEATHER.

**Proper Operations - Cleaning Connectors**

Connections on pressure washer hoses, gun and spray wand should be cleaned regularly and lubricated with engine oils of any grade or pressure washer antifreeze solution.

**Corrosive Solutions**

Never use.

- Bleach, chlorine products and other corrosive chemicals
- Liquids containing solvents (ie., paint thinners, gasoline, oils)
- Tri-sodium phosphate products
- Ammonia products
- Acid-based products

These chemicals will harm the unit and will damage the surface being cleaned.
IMPORTANT PRECAUTIONS – READ FIRST

⚠️ WARNINGS ⚠️
When using this product, basic precautions should always be followed:

• Read all the instructions before using the product.
• Water spray must never be directed toward any electric wiring, devices or directly toward the pressure washer machine itself, or fatal electric shock may occur.
• To reduce the risk of injury, do not operate the machine near children.
• Learn how to stop the machine and release pressure quickly. Be thoroughly familiar with the controls.
• Stay alert—watch what you are doing.
• For use with cold water supply only. Do not draw other liquids.
• The pressure washer should not be used in areas where gas vapours may be present. An electric spark could cause an explosion or fire.
• To minimize the amount of water getting into the pressure washer, the unit should be placed as far as possible from the cleaning site during operation.
• Avoid accidental starts. Shut power “OFF” before connecting or disconnecting cord to electrical outlets.
• Do not operate the product when fatigued or under the influence of alcohol or drugs.
• Do not stand on unstable surfaces. Stand with both feet balanced at all times.
• Prior to starting the pressure washer in cold weather, be sure ice has not formed on any part of the equipment.
• Never carry your pressure washer by the cord.
• Do not pull on the cord to disconnect from the outlet.
• To allow free air circulation, the pressure washer should not be covered during operation.
• Keep operating area clear of people and pets.
• Follow the maintenance instructions specified in the manual.

If replacement of the plug or cord is needed, use only identical replacement parts.
• This product or its power cord contains lead, a chemical known to cause cancer, birth defects or other reproductive harm. Wash hands after use.

⚠️ WARNINGS ⚠️
• Do not use with flammable liquids and toxic chemicals.
• Injection Hazard: Equipment can cause serious injury if the spray penetrates the skin.
• Do not point the gun at anyone or any part of the body. In case of penetration, seek medical aid immediately.
• This system is capable of producing high pressure as rated in the Technical Specifications. To avoid rupture and injury, do not operate this machine with components rated less than the unit itself (including but not limited to spray guns, hose and hose connections).
• Before servicing, cleaning or removal of any parts, shut “OFF” power and relieve pressure.
• Do not spray electrical apparatus and wiring.
• If connection is made to a portable water system, the system must be protected against backflow.

SAVE THESE INSTRUCTIONS

In a double-insulation product, two systems of insulation are provided instead of grounding. No grounding is provided on a double-insulated product, nor should a means for grounding be added to the product. Servicing a double-insulated product requires extreme care and knowledge of the system, and should be done only by qualified service personnel.

Replacement parts of a double-insulated product must be identical to the parts they replace. A double-insulated product is marked with the words “DOUBLE INSULATION” or “DOUBLE INSULATED”. The symbol “ ” may also be marked on the product.
SAFETY FEATURES & ELECTRICAL POWER INFORMATION

The pressure washer is equipped with a stop device that will sense when the trigger on the gun is released. It will open the power circuit to the motor, and cause the pressure washer motor to stop. The motor will start again when the trigger is pulled.

⚠️ WARNING ⚠️
The pressure washer is also equipped with a main power “ON/OFF” switch located on the unit. It should always be moved to the “OFF” position when the pressure washer is not being used to prevent possible injury or damage.

⚠️ DANGER ⚠️
Improper connection of power outlet can result in a risk of electric shock. Check with a qualified electrician or service personnel if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the product—If it will not fit the outlet, have a proper outlet installed by a qualified electrician. Do not use any type of adaptor with this product.

Extension Cords
If possible, do not use extension cords with this product. However, if you must use one, observe all of the warnings and instructions listed below:

⚠️ WARNING ⚠️
Extension cords are not recommended unless they are plugged into a ground fault circuit-interrupter (GFCI) found in circuit boxes or protected receptacles.

Use a sufficient gauge:
Maximum cable length: 50’ (15.2 m). Only use 12 or 14 AWG rated extension cords.
• Use only extension cords that are intended for outdoor use. These extension cords are identified by a marking that reads “Acceptable for use with outdoor appliances; store indoors while not in use.”
• Use only extension cords having an electrical rating not less than the rating of the product.
• Do not use damaged extension cords. Examine extension cord before using and replace if damaged. Do not abuse extension cord and do not yank on any cord to disconnect.
• Keep cord away from heat and sharp edges.
• Always disconnect the extension cord from the receptacle before disconnecting the product from the extension cord.
• To reduce the risk of electric shock, keep all connections dry and off the ground. Do not touch plug with wet hands.

⚠️ CAUTION ⚠️
This machine has been designed for use with detergents that are specifically approved for pressure washer use. The use of other cleaning detergents may affect the operation of the machine and void the warranty.

* Inlet adaptor comes pre-attached on the water inlet.
**Surface Preparation**
Before starting any cleaning task, it is important to inspect the area for objects that could create a hazard. Remove any objects from the work area that could be tripped over, such as toys or outdoor furniture. Ensure that all doors and windows are closed tightly.

**Water Supply (Cold Water Only)**
Only draw water through the unit. For use with cold water supply only. Water hose must be at least a 1/2" (13 mm) in diameter. Flow rate of water supply must not fall below 2 US GPM (US gallons per minute) [7.6 LPM (litres per minute)]. Flow rate can be determined by running the water for one minute into an empty 5-gallon (19 L) container. The water supply temperature must not exceed 104°F (40°C).

**CAUTION**
- Never use the pressure washer to draw in water contaminated with solvents (e.g. paint thinners, gasoline, oil, etc.).
- Dirt in the water inlet will damage the unit. To avoid this risk, we recommend checking the water filter (located inside the water inlet. To clean it out, see Maintenance section).
- Always prevent debris from being drawn into the unit by using a clean water source and an additional accessory water filter if required.
- To prolong the life of the unit, rest the unit for 5 minutes after every 30 minutes of use.

---

**ASSEMBLY AND OPERATING INSTRUCTIONS**

**Attach desired colour coded spray tip to wand. Ensure it is clicked in securely. Insert wand into the gun. Hand tighten only.**

- **Red**
  - 0°
  - For tough spots & grimes (e.g. concrete surface)

- **Yellow**
  - 15°
  - To clean larger areas (e.g. drive way)

- **Black**
  - Low pressure
  - To apply detergent
ASSEMBLY AND OPERATING INSTRUCTIONS

Attach the inlet adaptor to the machine’s water inlet (hand tighten only).

Attach quick-connect coupling to garden hose (hand tighten only) and connect to inlet adaptor.

Completely unwind power cord and plug the unit into an outlet.

Start the pressure washer by turning ON/OFF switch to ON.

Attach garden hose to water supply and turn water on

Make sure the ON/OFF switch is on the OFF position.

Depress trigger until there is steady stream of water.

CAUTION
Drain unit after each use (for storage): remove water connection, turn ON the machine for a few seconds and press gun trigger to bleed remaining water in the pump. Turn OFF immediately.
ASSEMBLY AND OPERATING INSTRUCTIONS

WORKING WITH DETERGENTS
Working with detergent ensures a quick soaking of the dirt, and allows the high-pressure water to penetrate and remove the dirt more effectively. Always spray detergent on a dry surface, do not pre-soak area. Wetting the surface first dilutes the detergent and reduces its cleaning ability.

To apply detergents you must be operating at low pressure. This provides a gentle application of detergent, with the pressure equivalent to the lowest garden hose. The high-pressure setting is used for cleaning; you cannot apply detergents when working at high pressure. Always test detergent in an inconspicuous area before use.

⚠️ CAUTION ⚠️
Only use cleaning detergents recommended for pressure washers.

1. Pull the detergent suction tube out and insert it into a detergent container.

2. Attach the low-pressure spray tip (black) for soap application.

3. Turn on the pressure washer. Pull trigger to operate unit. The liquid detergent will automatically mix with water, and be discharged through the nozzle. Apply detergent to a DRY work surface, from bottom to top.

SHUTTING DOWN AND CLEANING UP

4. Allow detergent to remain on the surface for a short time before rinsing. Do not allow detergent to dry on surface.

5. Rinse with clean water under high pressure. On a vertical surface, rinse from the bottom up, then rinse from the top down to avoid streaking. Hold nozzle 6-8" (15-20 cm) from the work surface, at a 45° angle.

6. When you have finished using the detergent injection system, fill detergent bottle with clean water. Siphon water at low pressure for one minute, so that all detergent is flushed through system. Remove detergent bottle, and rinse it until it is thoroughly cleaned.

⚠️ CAUTION ⚠️
Damage may occur to painted surface if chemical is allowed to dry on surface.
Wash and rinse a small section at a time. Avoid working on hot surfaces or in direct sunlight.

7. Turn off water supply and squeeze trigger to depressurize the unit. Failure to do so could result in personal injury due to discharge of high-pressure water.

TAKING A BREAK
If taking a break of five minutes or more:

1. Engage gun safety lock.

2. Turn unit to “OFF” (O) position.

3. Unplug the power cord from the outlet.
CAUTION

Failure to clean properly will cause the detergent injection system to become clogged and inoperable.

CAUTION

Never use:
- Bleach, chlorine products and other corrosive chemicals
- Liquids containing solvents (i.e., paint thinners, gasoline, oils)
- Tri-sodium phosphate products
- Ammonia products
- Acid-based products

These chemicals will harm the unit and will damage the surface being cleaned.

WINTERIZING AND LONG-TERM STORAGE

Optimum Winterizing Procedure
Winterizing your pressure washer will help protect and prolong its life. We strongly recommend you follow the below steps using Pressure Washer Antifreeze (039-8602-0). This will keep the internal parts lubricated, protected from rust, and prevents the pump from freezing.

1. Connect the pump saver hose onto the adaptor and quick-connect coupling.
2. Depress button on top of pump saver container.
3. Continue until fluid exits the pressure hose.
4. Remove the hose from pump inlet.

Quick Winterizing Procedure
If you cannot do the Optimum Winterizing procedure, you can still protect your pressure washer from winter damage by doing the below:

1. Disconnect all water connections.
2. Turn on the machine for a few seconds, until the remaining water in the pump exits. Turn off immediately.
3. Do not allow high-pressure hose to become kinked.
4. Store the machine and accessories in a room that does not reach freezing temperatures. Do not store near furnace or other sources of heat as it may dry out the pump seals.

CAUTION

Drain gun assembly of any remaining water. Aim gun downwards and squeeze trigger.
CLEANING AND MAINTENANCE

Connections
Connections on pressure washer hoses, gun and spray wand should be cleaned regularly and lubricated with non-water soluble grease.

Spray Tips Only
Clogging of the spray tips causes the pump pressure to be too high and cleaning is immediately required. You can clean the spray tips by carefully inserting a needle, or a thin, sharp instrument (i.e. paperclip) into the tip to rid it of deposits.

Water Filter Screen
The pressure washer is equipped with a water inlet screen to protect the pump. If the screen is not kept clean, the flow of water to the pressure washer will be restricted and the pump may be damaged.
1. To clean inner water screen, remove quick-connector and remove the filter screen from the pump inlet.
2. Rinse screen until it is free of debris and blockage.
3. Replace screen and quick-connector immediately to prevent any foreign matter from entering the pump.

TROUBLESHOOTING
Disconnect the machine from the power source before making any repairs.
