PREMIUM PRESSURE WASHER

INSTRUCTION MANUAL MANUAL DE INSTRUCCIONES

MODELS

MODELO

MSV2623

MSV3025

If your pressure washer is not working properly or if there are parts missing or broken, please **DO NOT RETURN IT TO THE PLACE OF PURCHASE**. Contact our customer service department at www.simpsoncleaning.com.

Si su lavadora a presión no trabaja correctamente ó encuentra partes rotas ófaltantes, por favor **NO LA REGRECE AL LUGAR DONDE LA COMPRO**. Contáctese con nuestro Departamento de Servicio al Cliente llamando al www.simpsoncleaning.com.

IMPORTANT: Please make certain that the person who is to use this equipment carefully reads and understands these instructions before operating.

IMPORTANTE: Asígurese por favor de que la persona que vaya a utilizar este equipo lea con cuidado y comprenda estas instrucciones antes de operar.

VEA EL ESPAÑOL EN LA CONTRAPORTADA. INSTRUCTIVO DE OPERACIÓN, CENTROS DE SERVICIO Y PÓLIZA DE GARANTÍA. ADVERTENCIA: LÉASE ESTE INSTRUCTIVO ANTES DE USAR EL PRODUCTO.

SAVE THIS MANUAL FOR FUTURE REFERENCE

Part No. 7104572 Rev. 1 JAN 2012

Please contact us for further information at www.allpartsinc.com

EASY INSTALLATION

⚠ WARNING: DO NOT OPERATE THIS UNIT UNTIL YOU READ THIS INSTRUCTION MANUAL AND THE ENGINE INSTRUCTION MANUAL FOR SAFETY, OPERATION AND MAINTENANCE INSTRUCTIONS.

INSTALACIÓN FÁCIL

⚠ AVERTENCIA: NO OPERE ESTE EQUIPO HASTA HABER LEÍDO Y ENTENDIDO LAS INSTRUCCIONES DE SEGURIDAD, OPERACIÓN Y MANTENIMIENTO EN ESTE MANUAL DEL OPERADOR Y EN EL MANUAL DEL PROPIETARIO DEL MOTOR.

1

PLACE HANDLE (G) ONTO FRAME (H), DEPRESS THE SNAP BUTTONS, AND SLIDE THE HANDLE ASSEMBLY ONTO THE FRAME UNTIL SNAP BUTTONS SNAP INTO PLACE.

NOTICE: Risk of personal injury. Avoid placing hands between handle and frame when assembling to prevent pinching.

COLOQUE EL ENSAMBLE DEL MANGO (G) SOBRE EL MARCO (H), OPRIMA LOS BOTONES DE ACCIÓN RÁPIDA Y DESLICE EL ENSAMBLE DEL MANGO SOBRE EL MARCO HASTA QUE LOS BOTONES QUEDEN ASEGUADOS EN EL LUGAR.

AVISO: Riesgo de lesión personal. Evite colocar las manos entre el mango y el marco cuando realice el ensamblado para no pellizcarse.

2

REMOVE THE COLORED QUICK-CONNECT NOZZLES (K) FROM THE PLASTIC BAG AND INSERT THEM INTO CORRECT GROMMET ON THE NOZZLE HOLDER. NOZZLES ARE COLOR CODED TO MATCH COLORED NOZZLES ON LABEL (Q).

RETIRE LAS BOQUILLAS DE CONEXIÓN RÁPIDA (K) DE COLORES DE LA BOLSA PLÁSTICA E INSÉRTELAS EN DE LA ARANDELA AISLANTE CORRECTA EN EL SOPORTE PARA BOQUILLAS. LAS BOQUILLAS ESTÁN CODIFICADAS POR COLOR, PARA COINCIDIR CON LAS BOQUILLAS COLOREADAS DEL ENSAMBLADO DEL ETIQUETA (Q).

3

CONNECT WAND (E) TO GUN (D). TIGHTEN SECURELY.

CONECTE EL TUBO APLICADOR A LA PISTOLA Y AJÚSTELO FIRMEMENTE.

4

PULL QUICK-CONNECT COUPLER (E) BACK AND INSERT NOZZLE (K).

RELEASE QUICK-CONNECT COUPLER AND TWIST NOZZLE TO MAKE SURE IT IS SECURE IN COUPLER.

TIRE EL ACOPLE DE CONEXIÓN RÁPIDA (E) HACIA ATRÁS E INSERTE LA BOQUILLA (K).

LIBERE EL ACOPLE Y GIRE LA BOQUILLA PARA ASEGURARSE DE QUE ESTÁ ASEGUADA DENTRO DEL ACOPLE.

5

ATTACH HIGH PRESSURE HOSE (C) TO GUN (D). TIGHTEN SECURELY.

CONECTE LA MANGUERA DE ALTA PRESIÓN A LA PISTOLA Y AJÚSTELA FIRMEMENTE.

**6**

CONNECT THE HIGH PRESSURE HOSE (C).
CONECTE EL TUBO DE ALTO PRESIÓN (C).

**7**

CONNECT THE GARDEN HOSE (N).
CONECTE LA MANGUERA DEL JARDÍN.

**8**

TURN INCOMING WATER ON.
NOTE: USE COLD WATER ONLY.
GIRE EL AGUA ENTRANTE.
NOTA: UTILIZAR SÓLO AGUA FRÍA

FULLY OPEN
ABRA
COMPLETAMENTE

9

SQUEEZE AND HOLD TRIGGER UNTIL WATER FLOW IS STEADY. RELEASE THE TRIGGER.
MANTENGA PULSADO EL ACCIONADOR HASTA QUE EL CAUDAL DE AGUA SE VUELVA CONSTANTE. SUELTE EL ACCIONADOR.

**10**

START ENGINE. SEE ENGINE OWNERS MANUAL FOR CORRECT PROCEDURE.
PONGA EL MOTOR EN MARCHA; REFÍERASE AL MANUAL DEL MOTOR PARA INFORMARSE DEL PROCEDIMIENTO CORRECTO.

NOTICE: THE ENGINE IS SHIPPED WITHOUT OIL. BEFORE STARTING ENGINE, ADD THE OIL PROVIDED. DAMAGE TO THE ENGINE WILL OCCUR IF THE ENGINE IS RAN WITHOUT OIL, THIS DAMAGE WILL NOT BE COVERED UNDER WARRANTY.

AVISO: EL MOTOR ES DESPACHADO SIN ACEITE. ANTES DE DAR ARRANQUE MOTOR, USE EL ACEITE QUE SE PROVEE. SI USED LE DA ARRANQUE AL MOTOR SIN ACEITE OCASIONARÁ DAÑOS IRREPARABLES EN EL MOTOR, DAÑOS QUENO ESTARÁN CUBIERTOS POR LA GARANTÍA.

SAFETY GUIDELINES - DEFINITIONS

This manual contains information that is important for you to know and understand. This information relates to protecting YOUR SAFETY and PREVENTING EQUIPMENT PROBLEMS. To help you recognize this information, we use the symbols below. Please read the manual and pay attention to these symbols.

⚠ DANGER: Indicates an imminently hazardous situation which, if not avoided, will result in **death or serious injury**.

⚠ WARNING: Indicates a potentially hazardous situation which, if not avoided, could result in **death or serious injury**.

⚠ CAUTION: Indicates a potentially hazardous situation which, if not avoided, may result in **minor or moderate injury**.

NOTICE: Indicates a practice **not related to personal injury** which, if not avoided, may result in **property damage**.

IMPORTANT SAFETY INSTRUCTIONS

⚠ DANGER: Carbon Monoxide. Using an engine indoors can kill you in minutes. Engine exhaust contains high levels of carbon monoxide (CO), a poisonous gas you cannot see or smell. You may be breathing CO even if you do not smell engine exhaust.

⚠ WARNING: This product and its exhaust contain chemicals known to the State of California to cause cancer, and birth defects and other reproductive harm.

- **NEVER** use an engine inside homes, garages, crawlspaces or other partly enclosed areas. Deadly levels of carbon monoxide can build up in these areas. Using a fan or opening windows and doors does **NOT** supply enough fresh air.
- **ONLY** use outdoors and far away from open windows, doors and vents. These openings can pull in engine exhaust.
- Even when the engine is used correctly, CO may leak into your home. **ALWAYS** use a battery-powered or battery backup CO alarm in your house. **Read and follow all directions for CO alarm before using.** If you feel sick, dizzy or weak at anytime, move to fresh air immediately. See a doctor. You could have carbon monoxide poisoning.

⚠ WARNING: Do not operate this unit until you read this instruction manual and the engine instruction manual for safety, operation and maintenance instructions. **If you have any questions regarding the product, please contact our customer service department at www.simpsoncleaning.com.**

⚠ DANGER: Risk of injection or severe injury. Keep clear of nozzle. do not direct discharge stream at persons. This product is to be used only by trained operators.

⚠ WARNING: This product may not be equipped with a spark-arresting muffler. If the product is not equipped and will be used around flammable materials or on land covered with materials such as agricultural crops, forest, brush, grass or other similar items, then an approved spark arrester must be installed and is legally required in the state of California. It is a violation of California statutes section 130050 and/or sections 4442 and 4443 of the California Public Resources Code, unless the engine is equipped with a spark arrester, as defined in section 4442, and maintained in effective working order. Spark arresters are also required on some U.S. Forest Service land and may also be legally required under other statutes and ordinances.

⚠ WARNING: This product and its exhaust contain chemicals known to the State of California to cause cancer, and birth defects or other reproductive harm. In addition, some cleaning products and dust contain chemicals known to the State of California to cause cancer, and birth defects or other reproductive harm. **Wash hands after handling.**

SAVE THESE INSTRUCTIONS

⚠ DANGER: RISK OF EXPLOSION OR FIRE

WHAT CAN HAPPEN	HOW TO PREVENT IT
<ul style="list-style-type: none"> Spilled gasoline and its vapors can become ignited from cigarette sparks, electrical arcing, exhaust gases and hot engine components such as the muffler. 	<ul style="list-style-type: none"> Shut off engine and allow it to cool before adding fuel to the tank. Use care in filling tank to avoid spilling fuel. Move pressure washer away from fueling area before starting engine.
<ul style="list-style-type: none"> Heat will expand fuel in the tank which could result in spillage and possible fire explosion. 	<ul style="list-style-type: none"> Keep maximum fuel level 1/2" (12.7 mm) below bottom of filler neck to allow for expansion.
<ul style="list-style-type: none"> Operating the pressure washer in an explosive environment could result in a fire. 	<ul style="list-style-type: none"> Operate and fuel equipment in well-ventilated areas free from obstructions. Equip areas with fire extinguisher suitable for gasoline fires.
<ul style="list-style-type: none"> Materials placed against or near the pressure washer can interfere with its proper ventilation features causing overheating and possible ignition of the materials. 	<ul style="list-style-type: none"> Never operate pressure washer in an area containing dry brush or weeds.
<ul style="list-style-type: none"> Muffler exhaust heat can damage painted surfaces, melt any material sensitive to heat (such as siding, plastic, rubber, vinyl or the pressure hose, itself), and damage live plants. 	<ul style="list-style-type: none"> Always keep pressure washer a minimum of 4' (1.2 m) away from surfaces (such as houses, automobiles or live plants) that could be damaged from muffler exhaust heat.
<ul style="list-style-type: none"> Improperly stored fuel could lead to accidental ignition. Fuel improperly secured could get into the hands of children or other unqualified persons. 	<ul style="list-style-type: none"> Store fuel in an OSHA approved container, in a secure location away from work area.
<ul style="list-style-type: none"> Use of acids, toxic or corrosive chemicals, poisons, insecticides, or any kind of flammable solvent with this product could result in serious injury or death. 	<ul style="list-style-type: none"> Do not spray flammable liquids.

**⚠ DANGER: RISK TO BREATHING (ASPHYXIATION)**

WHAT CAN HAPPEN	HOW TO PREVENT IT
<ul style="list-style-type: none"> Breathing exhaust fumes will cause serious injury or death! Engine exhaust contains carbon monoxide, an odorless and deadly gas. 	<ul style="list-style-type: none"> Operate pressure washer in a well-ventilated area. Avoid enclosed areas such as garages, basements, etc. Never operate unit in or near a location occupied by humans or animals.
<ul style="list-style-type: none"> Some cleaning fluids contain substances which could cause injury to skin, eyes or lungs. 	<ul style="list-style-type: none"> Use only cleaning fluids specifically recommended for high-pressure washers. Follow manufacturers recommendations. Do not use chlorine bleach or any other corrosive compound.

**⚠ DANGER: RISK OF FLUID INJECTION AND LACERATION**

WHAT CAN HAPPEN	HOW TO PREVENT IT
<ul style="list-style-type: none"> Your pressure washer operates at fluid pressures and velocities high enough to penetrate human and animal flesh, which could result in amputation or other serious injury. Leaks caused by loose fittings or worn or damaged hoses can result in injection injuries. DO NOT TREAT FLUID INJECTION AS A SIMPLE CUT! See a physician immediately! 	<ul style="list-style-type: none"> Inspect the high-pressure hose regularly. Replace the hose immediately if it is damaged, worn, has melted from contacting the engine, or shows any signs of cracks, bubbles, pinholes, or other leakage. Never grasp a high-pressure hose that is leaking or damaged. Never touch, grasp or attempt to cover a pinhole or similar water leak on the high-pressure hose. The stream of water IS under high pressure and WILL penetrate skin. Never place hands in front of nozzle. Direct spray away from self and others. Make sure hose and fittings are tightened and in good condition. Never hold onto the hose or fittings during operation. Do not allow hose to contact muffler. Never attach or remove wand or hose fittings while system is pressurized. When using replacement lances or guns with this pressure washer, DO NOT use a lance and/or lance/gun combination that is shorter in length than what was provided with this pressure washer as measured from the nozzle end of the lance to the gun trigger.
<ul style="list-style-type: none"> Injuries can result if system pressure is not reduced before attempting maintenance or disassembly. 	<ul style="list-style-type: none"> To relieve system pressure, shut off engine, turn off water supply and pull gun trigger until water stops flowing. Use only accessories rated equal to or higher than the rating of the pressure washer.

**⚠ DANGER: RISK OF INJURY FROM SPRAY**

WHAT CAN HAPPEN	HOW TO PREVENT IT
<ul style="list-style-type: none">• <i>High-velocity fluid spray can cause objects to break, propelling particles at high speed.</i>	<ul style="list-style-type: none">• <i>Always wear ANSI-approved Z87.1 safety glasses. Wear protective clothing to protect against accidental spraying.</i>• <i>Never point wand at or spray people or animals.</i>
<ul style="list-style-type: none">• <i>Light or unsecured objects can become hazardous projectiles.</i>	<ul style="list-style-type: none">• <i>Always secure trigger lock when wand is not in service to prevent accidental operation.</i>• <i>Never permanently secure trigger in pull-back (open) position.</i>

**⚠ DANGER: RISK OF UNSAFE OPERATION**

WHAT CAN HAPPEN	HOW TO PREVENT IT
<ul style="list-style-type: none">• <i>Unsafe operation of your pressure washer could lead to serious injury or death to you or others.</i>	<ul style="list-style-type: none">• <i>Do not use chlorine bleach or any other corrosive compound.</i>• <i>Become familiar with the operation and controls of the pressure washer.</i>• <i>Keep operating area clear of all persons, pets and obstacles.</i>• <i>Do not operate the product when fatigued or under the influence of alcohol or drugs. Stay alert at all times.</i>• <i>Never defeat the safety features of this product.</i>• <i>Do not operate machine with missing, broken or unauthorized parts.</i>• <i>Never leave wand unattended while unit is running.</i>
<ul style="list-style-type: none">• <i>If proper starting procedure is not followed, engine can kickback causing serious hand and arm injury.</i>	<ul style="list-style-type: none">• <i>If engine does not start after two pulls, squeeze trigger of gun to relieve pump pressure. Pull starter cord slowly until resistance is felt. Then pull cord rapidly to avoid kickback and prevent hand or arm injury.</i>
<ul style="list-style-type: none">• <i>The spray gun/wand is a powerful cleaning tool that could look like a toy to a child.</i>	<ul style="list-style-type: none">• <i>Keep children away from the pressure washer at all times.</i>
<ul style="list-style-type: none">• <i>Reactive force of spray will cause gun/wand to kickback, and could cause the operator to slip or fall or misdirect the spray. Improper control of gun/wand can result in injuries to self and others.</i>	<ul style="list-style-type: none">• <i>Do not overreach or stand on an unstable support.</i>• <i>Do not use pressure washer while standing on a ladder.</i>• <i>Grip gun/wand firmly with both hands. Expect the gun to kickback when triggered.</i>

DANGER: RISK OF INJURY OR PROPERTY DAMAGE WHEN TRANSPORTING OR STORING

WHAT CAN HAPPEN

- Fuel or oil can leak or spill and could result in fire or breathing hazard. Serious injury or death can result. Fuel or oil leaks will damage carpet, paint or other surfaces in vehicles or trailers.
- Oil could fill the cylinder and damage the engine if the unit is not stored or transported in an upright position.

HOW TO PREVENT IT

- If pressure washer is equipped with a fuel shut-off valve, turn the valve to the OFF position before transporting to avoid fuel leaks. If pressure washer is not equipped with a fuel shut-off valve, drain the fuel from tank before transporting. Only transport fuel in an OSHA-approved container. Always place pressure washer on a protective mat when transporting to protect against damage to vehicle from leaks.
Always transport and store unit in an upright position. Remove pressure washer from vehicle immediately upon arrival at your destination.

WARNING: RISK OF BURSTING

WHAT CAN HAPPEN

- Over inflation of tires could result in serious injury and property damage.
- High-velocity fluid spray directed at pneumatic tire sidewalls (such as found on automobiles, trailers and the like) could damage the sidewall resulting in serious injury.

HOW TO PREVENT IT

- Use a tire pressure gauge to check the tires pressure before each use and while inflating tires; see the tire sidewall for the correct tire pressure.
NOTE: Air tanks, compressors and similar equipment used to inflate tires can fill small tires similar to these very rapidly. Adjust pressure regulator on air supply to no more than the rating of the tire pressure. Add air in small increments and frequently use the tire gauge to prevent over inflation.
- On pressure washers rated above 1600 psi (11032 kPa) use the widest fan spray (40° nozzle) and keep the spray a minimum of 8" (20 cm) from the pneumatic tire sidewall. Do not aim spray directly at the joint between the tire and rim.

WARNING: RISK OF HOT SURFACES

WHAT CAN HAPPEN

- Contact with hot surfaces, such as engines exhaust components, could result in serious burn.

HOW TO PREVENT IT

- During operation, touch only the control surfaces of the pressure washer. Keep children away from the pressure washer at all times. They may not be able to recognize the hazards of this product.

⚠ WARNING: RISK OF CHEMICAL BURN

WHAT CAN HAPPEN	HOW TO PREVENT IT
<ul style="list-style-type: none">• Use of acids, toxic or corrosive chemicals, poisons, insecticides, or any kind of flammable solvent with this product could result in serious injury or death.	<ul style="list-style-type: none">• Do not spray acids, gasoline, kerosene, or any other flammable materials with this product. Use only household detergents, cleaners and degreasers recommended for use with pressure washers.• Wear protective clothing to protect eyes and skin from contact with sprayed materials.

⚠ WARNING: RISK OF ELECTRICAL SHOCK

WHAT CAN HAPPEN	HOW TO PREVENT IT
<ul style="list-style-type: none">• Spray directed at electrical outlets or switches, or objects connected to an electrical circuit, could result in a fatal electrical shock.	<ul style="list-style-type: none">• Unplug any electrically operated product before attempting to clean it. Direct spray away from electric outlets and switches.

⚠ WARNING: RISK OF INJURY FROM LIFTING

WHAT CAN HAPPEN	HOW TO PREVENT IT
<ul style="list-style-type: none">• Serious injury can result from attempting to lift too heavy an object.	<ul style="list-style-type: none">• The pressure washer is too heavy to be lifted by one person. Obtain assistance from others before lifting.

**SAVE THESE INSTRUCTIONS
FOR FUTURE USE**

GET TO KNOW THE PRESSURE WASHER

NOTE: Photographs and line drawings used in this manual are for reference only and do not represent a specific model.

Compare the illustrations with your unit to familiarize yourself with the location of various controls and adjustments. Save this manual for future reference.

BASIC ELEMENTS OF A PRESSURE WASHER (FIG. 1)

- A. **High Pressure Pump** (not shown): Increases the pressure of the water supply.
- B. **Engine:** Drives the high pressure pump. Refer to the engine manual for location and operation of engine controls.
- C. **High Pressure Hose:** Carries the pressurized water from the pump to the gun and spray wand.
- D. **Spray Gun:** Connects with spray wand to control water flow rate, direction, and pressure.
- E. **Quick-Connect Spray Wand:** Allows the user to quickly change out high-pressure nozzles. See **How To Use Spray Wand** instructions in *Operation* section.
- F. **Detergent Siphon Hose (MSV2623)** (not shown): Feeds cleaning agents into the pump to mix with the water. See **How To Apply Chemicals/Cleaning Solvents** instructions in *Operation* section.

- G. Handle
- H. Frame
- I. Pump Outlet
- J. Pump Inlet
- K. Quick Connect Nozzles
- L. On Board Detergent Tank (MSV3025): Feeds cleaning agents into the pump to mix with the water. See **How To Apply Chemicals/Cleaning Solvents** instructions in *Operation* section.

BASIC ELEMENTS OF AN ENGINE

Refer to the engine manual for location and operation of engine controls.

Choke Control: Opens and closes carburetor choke valve.

Starter Grip: Pulling starter grip operates recoil starter to crank engine.

Engine Switch: Enables and disables ignition system.

ASSEMBLY INSTRUCTIONS (FIG. 1– 4)

1. Locate and remove all loose parts from the carton.
2. Cut four corners of the carton from top to bottom and lay the panels flat.
3. Place handle (G) onto frame (H), depress the snap buttons, and slide the handle assembly onto the frame until snap buttons snap into place.

NOTICE: Risk of personal injury. Avoid placing hands between handle and frame when assembling to prevent pinching.

4. Remove the colored quick-connect nozzles (K) from the plastic bag and insert them into correct grommet on the nozzle holder. Nozzles are color coded to match colored nozzles on label (Q).
5. Connect wand (E) to gun (D). Tighten securely.
6. Attach high pressure hose (C) to gun (D). Tighten securely.

NOTE: The pump on this unit is maintenance free and requires no oil. If there is a problem with the pump, contact our Customer Service Group on www.simpsoncleaning.com as soon as possible.

NOTICE: The engine is shipped without oil. Before starting engine, add the oil provided. Damage to the engine will occur if the engine is ran without oil, this damage will not be covered under warranty.

OPERATION

PRESSURE WASHER TERMINOLOGY

PSI: Pounds per Square Inch. The unit of measure for water pressure. Also used for air pressure, hydraulic pressure, etc. Sometimes noted as "Bar", another unit of measure.

GPM: Gallons per Minute. The unit of measure for the flow rate of water.

CU: Cleaning Units. GPM multiplied by psi equals CU.

Bypass Mode: Allows water to re-circulate within the pump when the gun trigger is not pulled. This feature allows the operator to release the trigger gun and reposition themselves without having to turn the engine off in between cleaning actions.

NOTICE: Allowing the unit to run for more than two minutes without the gun trigger being pulled could cause overheating and damage to the pump. Do not let the pressure washer run for more than two minutes in Bypass Mode. Turn off the engine and relieve the pressure in the gun during these extended situations.

Thermal Relief Valve (P): When the temperature inside the pump rises too high, this valve will open and release a gush of water in an effort to lower the temperature inside the pump. The valve will then close.

Detergent Injection System: Mixes cleaners or cleaning solvents with the water to improve cleaning effectiveness.

Water Supply: All pressure washers must have a source of water. The minimum requirements for a water supply are 20 psi and 5 Gallons Per Minute. If your water source is a well, the garden hose length can only be 30 ft. (9 m) max.

⚠ WARNING: To reduce the possibility of contamination always protect against backflow when connected to a potable water system.

PRESSURE WASHER OPERATING FEATURES

PRESSURE ADJUSTMENTS

The pressure setting is preset at the factory to achieve optimum pressure and cleaning. If you need to lower the pressure, it can be accomplished by these methods.

1. **Back away from the surface to be cleaned.** The further away you are, the less the pressure will be on the surface to be cleaned.
2. **Change to the 40° nozzle (white).** This nozzle delivers a less powerful stream of water and a wider spray pattern. Refer to **How To Use Spray Wand**.

NOTICE: DO NOT attempt to increase pump pressure. A higher pressure setting than the factory set pressure may damage pump.

HOW TO USE SPRAY WAND

The nozzles for the spray wand are stored in the nozzle holder on the panel assembly. Colors on the panel identify nozzle location and spray pattern. Refer to the following chart to choose the correct nozzle for the job to be performed.

CHANGING NOZZLES ON SPRAY WAND

⚠ DANGER: Risk of fluid injection. Do not direct discharge stream toward persons, unprotected skin, eyes or any pets or animals. Serious injury will occur.

⚠ WARNING: Flying objects could cause risk of serious injury. Do not attempt to change nozzles while pressure washer is running. Turn engine off before changing nozzles.

1. Pull quick-connect coupler (E) back and insert nozzle (K).
2. Release quick-connect coupler and twist nozzle to make sure it is secure in coupler.

⚠ WARNING: Flying object could cause risk of serious injury. Ensure nozzle is completely inserted in quick-connect socket and quick-connect snap ring is fully engaged (forward) before squeezing gun trigger.

NOZZLE COLOR	SPRAY PATTERN	USES	SURFACES*
Red	0° 	powerful pinpoint for spot cleaning of hard, unpainted surfaces or for high reach areas	unpainted metal or concrete; DO NOT use on wood
Yellow	15° 	intense cleaning of unpainted hard surfaces	grills, driveways, concrete or brick walkways, unpainted brick or stucco
White	40° 	cleaning of painted or delicate surfaces	Auto/RV, marine, wood, painted brick and stucco, vinyl, painted siding
Black	low pressure 	applies cleaning solutions	Low pressure spray is safe on all surfaces. Always verify compatibility of cleaning solution prior to use.

***NOTICE:** The high pressure spray from your pressure washer is capable of causing damage to surfaces such as wood, glass, automobile paint, auto striping and trim, and delicate objects such as flowers and shrubs. Before spraying, check the item to be cleaned to assure yourself that it is strong enough to resist damage from the force of the spray.

HOW TO APPLY CHEMICALS/CLEANING SOLVENTS (FIG. 7)

Applying chemicals or cleaning solvents is a low pressure operation. **NOTE:** Use only soaps and chemicals designed for pressure washer use. **Do not use bleach.**

To Apply chemicals (MSV2623):

1. Press detergent siphon hose (F, Figure 7A) onto barbed fitting located near high pressure hose connection of pump as shown.
2. Place other end of detergent siphon hose with filter on it into container holding chemical/cleaning solution. **NOTE:** For every 7 gallons of water pumped 1 gallon of chemical/cleaning solution will be used.
3. Install low pressure (black) nozzle into quick connect fitting of spray wand, see **How To Use Spray Wand** paragraph in this section.

4. After use of chemicals, place detergent siphon hose into container of clean water and draw clean water through chemical injection system to rinse system thoroughly. If chemicals remain in the pump it could be damaged. Pumps damaged due to chemicals will not be covered under warranty.

NOTE: Chemicals and soaps will not siphon if the black soap nozzle is not installed on the spray wand.

To Apply chemicals (MSV3025):

1. Fill your detergent tank (L, Figure 7B) with pre-mixed cleaning solutions designed for pressure washer use.
2. Check and make sure the valve (R) for the tank is in the "OPEN" position. **NOTE:** For every 7 gallons of water pumped 1 gallon of chemical/cleaning solution will be used.
3. Install low pressure (black) nozzle into quick connect fitting of spray wand, see **How To Use Spray Wand** paragraph in this section.
4. After use of chemicals, refill your detergent tank with clean water and operate your chemical injection system to rinse it thoroughly. If chemicals remain in the pump it could be damaged. Pumps damaged due to chemicals will not be covered under warranty.

NOTE: After use turn valve (R) to CLOSED position.

NOTE: Chemicals and soaps will not siphon if the black soap nozzle is not installed on the spray wand.

STARTING (FIG. 8-11)

⚠ WARNING: To reduce the risk of injury, read the pressure washer instruction manual and the engine instruction manual before starting pressure washer.

⚠ DANGER: Risk of fluid injection and laceration. When using the high-pressure setting, DO NOT allow the high-pressure spray to come in contact with unprotected skin, eyes, or with any pets or animals. Serious injury will occur.

- Your washer operates at fluid pressures and velocities high enough to penetrate human and animal flesh, which could result in amputation or other serious injury. Leaks caused by loose fittings or worn or damaged hoses can result in injection injuries. DO NOT TREAT FLUID INJECTION AS A SIMPLE CUT! See a physician immediately!

⚠ WARNING: Risk of Fire, Asphyxiation and Burn. Never fill fuel tank when engine is running or hot. Do not smoke when filling fuel tank.

- Never fill fuel tank completely. Fill tank to 1/2" (12.7 mm) below bottom of filler neck to provide space for fuel expansion. Wipe any fuel spillage from engine and equipment before starting engine.
- Never run engine indoors or in enclosed, poorly ventilated areas. Engine exhaust contains carbon monoxide, an odorless and deadly gas.
- DO NOT let hoses come in contact with very hot engine muffler during or immediately after use of your pressure washer. Damage to hoses from contact with hot engine surfaces will NOT be covered by warranty.

NOTICE: Risk of property damage. Never pull water supply hose to move pressure washer. This could damage hose and/or pump inlet.

- *DO NOT use hot water, use cold water only.*
- *Never turn water supply off while pressure washer engine is running or damage to pump will result.*
- *DO NOT stop spraying water for more than two minutes at a time. Pump operates in bypass mode when spray gun trigger is not pressed. If pump is left in bypass mode for more than two minutes internal components of the pump can be damaged.*

If you do not understand these precautions, please contact our customer service department at www.simpsoncleaning.com!

Prior to starting, refer to your engine manual for proper starting procedure.

1. In a well ventilated outdoor area add fresh, high quality, unleaded gasoline with a pump octane rating of 86 or higher. Do not overfill. Wipe up spilled fuel before starting the engine. Refer to **Engine Owners Manual** for correct procedure.
2. Check engine oil level. See **Engine Owners Manual** for correct procedure.
3. Connect the water hose to the water source. Turn the water source on to remove all air from the hose. When a steady stream of water is present, turn the water source off.
4. Verify the filter screen (M) is in water inlet of pump. **NOTE:** Cone side faces out.
5. Connect high pressure hose (C) to pump outlet (I).
6. Connect water source (N) to pump inlet (J). **NOTE:** Water source must provide a minimum of 5 gallons per minute at 20 psi.

⚠ WARNING: *To reduce the possibility of contamination always protect against backflow when connected to a potable water system.*

7. Choose the correct nozzle for the job to be performed. See **How To Use spray Wand** instructions in this section. **NOTE:** If applying a chemical or cleaning solution, see **How To Apply Chemicals/Cleaning Solvents** instructions in this section.
8. Turn water source on.

NOTICE: *Risk of property damage. Failure to do so could cause damage to the pump.*

9. Remove all air from the pump and high pressure hose by depressing trigger until a steady stream of water is present.
10. Start engine. See **Engine Owners Manual** for correct procedure.

⚠ WARNING: *Risk of unsafe operation. If engine does not start after two pulls, squeeze trigger of gun to relieve pump pressure. Pull starter cord slowly until resistance is felt. Then pull cord rapidly to avoid kickback and prevent hand or arm injury.*

11. Depress trigger on gun to start water flow.

⚠ WARNING: Risk of unsafe operation. Stand on a stable surface and grip gun/spray wand firmly with both hands. Expect the gun to kick when triggered.

12. Release trigger to stop water flow.

⚠ WARNING: Risk of injury from spray. Always engage the trigger lock (O) when gun is not in use. Failure to do so could cause accidental spraying.

SHUTTING DOWN

1. After each use, if you have applied chemicals, place detergent siphon hose into container of clean water and draw clean water through chemical injection system to rinse system thoroughly.

NOTICE: Risk of property damage. Failure to do so could cause damage to the pump.

2. Turn engine off. See **Engine Owner's Manual**.

NOTICE: Risk of property damage. NEVER turn the water off with the engine running.

3. Turn water source off.

4. Pull trigger on spray gun to relieve any water pressure in hose or spray gun.

5. See *Storage* section in this manual for proper storage procedures.

MAINTENANCE

⚠ WARNING: Risk of burn hazard. When performing maintenance, you may be exposed to hot surfaces, water pressure or moving parts that can cause serious injury or death.

⚠ WARNING: Risk of fire hazard. Always disconnect, spark plug wire, let the engine cool and release all water pressure before performing any maintenance or repair. The engine contains flammable fuel. Do not smoke or work near open flames while performing maintenance.

To ensure efficient operation and longer life of your pressure washer, a routine maintenance schedule should be prepared and followed. If the pressure washer is used in unusual conditions, such as high-temperatures or dusty conditions, more frequent maintenance checks will be required.

ENGINE

Consult the **Engine Owners Manual** for the manufacturer's recommendations for any and all maintenance. **NOTE:** The engine drain plug is located at the rear of the unit.

PUMP

The pump was filled with oil at the factory. The pump on this unit is maintenance free and requires no oil. If there is a problem with the pump contact us at www.simpsoncleaning.com

CONNECTIONS

Connections on pressure washer hoses, gun and spray wand should be cleaned regularly and lubricated with light oil or lithium grease to prevent leakage and damage to the o-rings.

NOZZLE CLEANING (FIG. 12)

If the nozzle becomes clogged with foreign materials, such as dirt, excessive pressure may develop. If the nozzle becomes partially clogged or restricted, the pump pressure will pulsate. Clean the nozzle immediately using the nozzle kit supplied and the following instructions:

1. Shut off the pressure washer and turn off the water supply.
2. Pull trigger on gun handle to relieve any water pressure.
3. Disconnect the spray wand from the gun.
4. Remove the high-pressure nozzle (K) from the spray wand. Remove any obstructions with the nozzle cleaning tool provided and backflush with clean water.
5. Direct water supply (N) into spray wand to backflush loosened particles for 30 seconds.
6. Reassemble the nozzle to the wand.
7. Reconnect spray wand to gun and turn on water supply.
8. Start pressure washer and place spray wand into high pressure setting to test.

CLEAN THE WATER INLET FILTER (FIG. 8)

This screen filter should be checked periodically and cleaned if necessary.

1. Remove filter by grasping end and removing it from water inlet of pump.
2. Clean filter by flushing it with water on both sides.
3. Re-insert filter into water inlet of pump. **NOTE:** Cone side faces out.

NOTE: Do not operate the pressure washer without filter properly installed.

STORAGE

ENGINE

Consult the Engine Owners Manual for manufacturer's recommendations for storage.

PUMP (FIG. 13)

NOTICE: The manufacturer recommends using a pump protector/winterizer when storing the unit for more than 30 days and/or when freezing temperatures are expected. **FREEZE DAMAGE IS NOT COVERED BY THE WARRANTY.**

Pump protector/winterizer is usually available at the store where the pressure washer was purchased. If a pump protector/winterizer is not available, RV antifreeze needs to be run through the pump as outlined in the steps below.

NOTE: Using a pump protector/winterizer or RV antifreeze is to provide proper lubrication to the internal seals of the pump regardless of temperature or environment.

1. Obtain a funnel, 6 ounces (170 mL) of RV Antifreeze, and a 16" to 36" (40-91 cm) section of garden hose with a male hose connector attached to one end.

NOTICE: Risk of Property Damage. Use only RV Antifreeze. Any other antifreeze is corrosive and can damage the pump.

2. Disconnect the spark plug wire.

3. Connect the length of garden hose to the water inlet of the pump.
4. Add RV Antifreeze to hose as shown.
5. Pull starter rope slowly several times until antifreeze comes out of the high pressure hose connection of the pump.
6. Remove garden hose from water inlet of pump.
7. Reconnect spark plug wire.

PRESSURE WASHER

1. Drain all water from high pressure hose and wrap it onto hose wrap.
2. Drain all water from the spray gun and wand by holding spray gun in a vertical position with nozzle end pointing down and squeezing trigger. Store in gun holder.
3. Store detergent siphon hose, if so equipped, so it is protected from damage.

ACCESSORIES

⚠ DANGER: Risk of fluid injection. When using replacement lances or guns with this pressure washer, DO NOT use a lance and/or lance/gun combination that is shorter in length than what was provided with this pressure washer as measured from the nozzle end of the lance to the gun trigger.

NOTICE: The use of any other accessory not recommended for use with this tool could be hazardous. Use only accessories rated equal to or greater than the rating of the pressure washer.

SPECIFICATIONS

MODEL	MSV2623	MSV3025
PSI Max*	2600 psi	3000 psi
GPM Max*	2.3 gpm	2.5 gpm
High Pressure Hose	25 ft. (7.6 m)	25 ft. (7.6 m)
Pressure of Inlet Water	20–100 psi	20–100 psi
Inlet Water	cold tap	cold tap
Soap Consumption Rate	10% max	10% max

* Water flow and maximum pressure ratings determined in accordance with PWMA standard PW101.

In our effort towards Continuous Improvement, specifications are subject to change without notice.

SERVICE INFORMATION

Do not return this product to your retailer. Please contact our customer service department at www.simpsoncleaning.com.

LIMITED WARRANTY

90 DAY LIMITED WARRANTY ON PRODUCT COMPONENTS EXCLUDING PUMP

SIMPSON® warrants to the original purchaser that the wheels, gun, hose, wand, spray nozzle(s) and other components of the **SIMPSON®** pressure washer covered under this warranty are free from defects in material and workmanship for 90 days from the date of purchase.

ONE YEAR LIMITED WARRANTY ON PUMP AND FRAME

SIMPSON[®] warrants to the original purchaser that the pump of the *SIMPSON*[®] pressure washer covered under this warranty is free from manufacturer's defects in material and workmanship for one year from the date of purchase. The one year limited warranty applies to the pump only.

SIMPSON[®] will repair or replace, at *SIMPSON*[®]'s option, products or components which have failed within the above warranty periods. Service will be scheduled according to the normal work flow and business hours at the service center location, and the availability of replacement parts. All decisions of *SIMPSON*[®] with regard to this limited warranty shall be final.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

ENGINE WARRANTY

The engine warranty is covered under the terms and conditions as outlined by the engine manufacturer's warranty contained herein and is sole responsibility of the engine manufacturer.

RESPONSIBILITY OF ORIGINAL PURCHASER (INITIAL USER):

- To process a warranty claim on your *SIMPSON*[®] pressure washer, report the concern to **www.simpsoncleaning.com** for authorization and direction to the nearest authorized service centre in your area.
- Retain original cash register sales receipt as proof of purchase for warranty work.
- Use reasonable care in the operation and maintenance of the product as described in the Owners Manual(s).

THIS WARRANTY DOES NOT COVER:

- Merchandise sold as reconditioned, used as rental equipment, or floor or display models.
- Merchandise that has become damaged or inoperative because of ordinary wear, misuse, cold, heat, rain, excessive humidity, freeze damage, use of improper chemicals, negligence, accident, failure to operate the product in accordance with the instructions provided in the Owners Manual(s) supplied with the product, improper maintenance, the use of accessories or attachments not recommended by *SIMPSON*[®], or unauthorized repair or alterations.
- Repair and transportation costs of merchandise determined not to be defective.
- Costs associated with assembly, required oil, adjustments or other installation and start-up costs.
- Expendable parts or accessories supplied with the product which are expected to become inoperative or unusable after a reasonable period of use, including but not limited to springs, nozzles, o-rings, washers, and similar accessories.
- Merchandise sold by *SIMPSON*[®] which has been manufactured by and identified as the product of another company, such as gasoline engines. The product manufacturer's warranty, if any, will apply.
- **ANY INCIDENTAL, INDIRECT OR CONSEQUENTIAL LOSS, DAMAGE, OR EXPENSE THAT MAY RESULT FROM ANY DEFECT, FAILURE OR MALFUNCTION OF THE PRODUCT IS NOT COVERED BY THIS WARRANTY.** Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.
- **IMPLIED WARRANTIES, INCLUDING THOSE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR FROM THE DATE OF ORIGINAL PURCHASE.** Some states do not allow limitations on how long an implied warranty lasts, so the above limitations may not apply to you.

TROUBLE SHOOTING GUIDE

OPERATIONAL ISSUE	POSSIBLE CAUSE	SOLUTION
Engine will not start (see Engine Manual for further engine troubleshooting)	No fuel.	Add Fuel.
	Pressure builds up after two pulls on the recoil starter or after initial use.	Squeeze gun trigger to relieve pressure.
	Choke lever in the "No Choke" position.	Move choke to the "Choke" position.
	Spark plug wire not attached.	Attach spark plug wire.
	Engine switch in OFF position.	Place engine switch in ON position.
	Choke lever in the "Choke" position on a "hot" engine or an engine that has been exposed to thermal heat for a long period of time.	Move choke to the "No Choke" position.
No or low pressure (initial use)	Spray wand not in high pressure.	See How to Use Spray Wand instructions in the <i>Operation</i> Section.
	Low water supply.	Water supply must be at least 5 gpm @ 20 psi.
	Leak at high pressure hose fitting.	Repair leak. Apply sealant tape if necessary.
	Nozzle obstructed.	See Nozzle Cleaning instructions in the <i>Maintenance</i> section.
	Water filter screen clogged.	Remove and clean filter.
	Air in hose.	Turn off the engine, then the water source. Disconnect the water source from the pump inlet and turn the water source on to remove all air from the hose. When there is a steady stream of water present, turn water source off. Re-connect water source to pump inlet and turn on water source. Squeeze trigger to remove remaining air
No or low pressure (initial use)	Choke in the "Choke" position.	Move choke to the "No Choke" position.
	High pressure hose is too long.	Use high pressure hose under 100 feet (30 m).

OPERATIONAL ISSUE	POSSIBLE CAUSE	SOLUTION
Will not draw chemicals	Spray wand not in low pressure.	See How to Use Spray Wand paragraph in the <i>Operation</i> Section.
	Chemical filter clogged.	Clean filter.
	Chemical screen not in cleaning solution.	Make sure end of detergent siphon hose is fully submerged into cleaning solution.
	Chemical too thick.	Dilute chemical. Chemical should be the same consistency as water.
	Pressure hose is too long	Lengthen water supply hose instead of high pressure hose.
	Chemical build up in chemical injector.	Please contact our customer service department at www.simpsoncleaning.com .
	Tank valve (R) in the CLOSED position.	Make sure tank valve (R) is in the OPEN position.
No or low pressure (after period of normal use)	Worn seal or packing	Please contact our customer service department at www.simpsoncleaning.com .
	Worn or obstructed valves.	Please contact our customer service department at www.simpsoncleaning.com .
	Worn unloader piston.	Please contact our customer service department at www.simpsoncleaning.com .
Water leaking at gun/spray wand connection	Worn or broken o-ring.	Check and replace.
	Loose hose connection.	Tighten.
Water leaking at pump	Loose connections.	Tighten.
	Piston packings worn.	Please contact our customer service department at www.simpsoncleaning.com .
	Worn or broken o-rings.	Please contact our customer service department at www.simpsoncleaning.com .
	Pump head or tubes damaged from freezing.	Please contact our customer service department at www.simpsoncleaning.com .
Pump Pulsates	Nozzle obstructed.	See Nozzle Cleaning paragraph in the <i>Maintenance</i> section for the correct procedure.
