

PUMP TIPS — PW24/2.3L

- Make sure to remove the yellow plug after installing the pump.
- If changing the pump oil, do not use engine oil. Pressure washer pump oil is required. Contact us with any questions.
- When storing over winter or in cold conditions, make sure to use Pump Saver or antifreeze to prevent pump damage.

Please contact APW Distributing with any questions or concerns **888-279-9274**
